- Played active role in assisting colleagues.
- Involved in the requirement study, design, and development of the test cases
- Test Execution of system test suite.
- Review and track the deliverables with the reporting of the same to the concern manager.
- Designed and executed test cases according to functional specifications.
- Performed Functionality Testing, Retesting and Regression Testing through Automation Testing using Selenium for validation of end-to-end scenarios. Responsible for creation of test scripts for the existing Hybrid Framework

2.PROJECT

Project name: Tantagatha

Domain: E-commerce Domain

Client: Tanta Gatha Foundation, Mayurbhanj, Odisha

Testing Methodology: Manual testing, Functional Testing, Automation Testing

Project Description:

The Tanta Gatha story has been one of exploration. An exploration of people, their craft and culture. It has also been a story of conversations with craftsmen and master weavers to take a glimpse into their textile vocabulary and comprehend the tradition behind the craft. From these guardians of intangible human heritage have emerged our collection of designs. Designs that are born out of a need to cherish, revive and preserve.

E-commerce is the activity of buying or selling of products on online services or over the Internet. Electronic commerce draws on technologies such as mobile commerce, electronic funds transfer, supply chain management, Internet marketing, online transaction processing, electronic data interchange (EDI), inventory management systems, and automated data collection systems. Modern electronic commerce typically uses the World Wide Web for at least one part of the transaction's life cycle although it may also use other technologies such as e-mail.

Responsibilities :

- Understand the Business and Functional requirements to identify Test Scenarios.

- Created and executed the test cases for various scenarios, and participated actively in Functional Testing, validation testing, Usability testing, Compatibility testing, Retesting, Regression testing.
- Involved in preparation of daily and weekly status reports.
- Involved in Scrum meetings.
 - Interacting with developers in resolving the bugs.
- Analyze customer requirement
- Designing and Executing test cases from the Functional specifications.
- Participated in the Test case review meetings and send review comments to Team member
- Performed Functionality Testing, Retesting and Regression Testing.
- Interact with developers and discussed technical problems, Bugs Tracking and Generating Reports.
- Reporting the Regular status to the higher authorities in a timely manner
